METHOD OF CULTIVATING HUMAN TISSUE DISCOVERED.

After Removal From Body It Will Continue to Grow Indefinitely.

New York, Oct. 5.—A method of cultivating human tissue after its removal from the body so that it probably will continue to grow and multiply indefinitely, was announced Wednesday by Dr. Robert A. Lambert of the pathological laboratory of the Presbyterian hospital. Whether the experiments would have any value in conserving human life the investigator does not say.

In describing the result of his experiments, Dr. Lambert said that the difficulty in finding a culture medium for human tissues can be overcome by adding to human plasma or serum a small quantity of fowl or pigeon plasma, the fibrin of which is highly resistant to digestion.

"Human tissue," he said, "has been propagated in this medium for several months through sub-cultures and the growth in vitro (glass jars) can probably be maintained indefinitely."

A Musical Masterpiece is the Edison Diamond Disc Phonograph

THE WORLD'S BEST INTERPRETER OF THE WORLD'S BEST MUSIC.

There is nothing in the Phonograph line to compare with the Edison Diamond Disc. Superior in mechanical construction, superior in design and cabinet work; vastly superior in its ability to re-create music; to render a masterpiece exactly like the artist would do it. To hear an Edison Diamond Disc is like listening to the world's best music first handed. You will give evidence of good judgement if your purchase of a Phonograph is an Edison Diamond Disc.

EDISON'S RECORDS.

Edison Artists are among the best talent the world produces. For real, artistic merit there are none better than many of the great singers and musicians retained exclusively by Mr. Edison.

The Purchaser Profits More Than the Dealer from a standpoint of profit, the purchaser is the gainer. It would profit the dealer more to sell other machines, the consumer profits by buying an EDISON, the dealer suffers a loss of profit possible in selling other makes.

See an Edison, hear an Edison, and you'll buy an Edison—That's our candid belief.
